

BATHULA CHIRANJEEVI

+91 9347631068 | chiranjeevibathula06@gmail.com | LinkedIn | GitHub | Portfolio

Professional Summary

Computer Science undergraduate with hands-on experience in Generative AI, full-stack development, and intelligent application development. Skilled in building AI-powered products, RAG systems, automation workflows, SaaS platforms, and mobile applications using modern AI and web technologies. Passionate about solving real-world problems through innovative AI solutions, scalable software development, and continuous learning.

Education

B.Tech in Computer Science and Engineering

2023 – 2027

JNTUA College of Engineering, Anantapur

CGPA: 9.18/10

Intermediate – Mathematics, Physics and Chemistry

2021 – 2023

Sri Vikas Junior College, Vinjamur

Percentage: 98%

Technical Skills

Languages: Python, Java, C, JavaScript, TypeScript

Frameworks: React.js, Next.js, Node.js, PHP, HTML5, CSS3, Tailwind CSS, FastAPI

Generative AI: OpenAI API, RAG, AI Agents, Prompt Engineering, Embeddings, Semantic Search

Databases: PostgreSQL, MySQL, Qdrant

Tools & Platforms: Git, GitHub, Docker, Supabase, Vercel, n8n, Streamlit

Core Concepts: Data Structures & Algorithms, OOP, DBMS, Operating Systems, REST APIs

Experience

Generative AI Engineer Intern

May 2026 – June 2026

DeepDrishti.ai

- Contributed to the development of an AI Prior-Art Discovery Engine using semantic search, vector embeddings, and LLMs for patent intelligence.
- Implemented RAG pipelines using Sentence Transformers, Qdrant, OpenAI API, and FastAPI for contextual information retrieval.
- Built AI automation workflows and AI agents using n8n, integrating OpenAI APIs and external services for business automation.
- Gained hands-on experience in Generative AI, vector databases, React, REST APIs, Docker, prompt engineering, and full-stack AI development.

Projects

AI Prior-Art Discovery Engine (Internship Project) | React, FastAPI, Python, OpenAI API, Qdrant

GitHub

- Built an AI-powered patent intelligence platform for semantic prior-art search using vector embeddings and LLMs.
- Implemented novelty scoring, claim overlap analysis, knowledge graphs, and automated PDF report generation.

RankForge AI | Python, Streamlit, Pandas, NLP, Information Retrieval

GitHub | Live Demo

- Built an AI-powered candidate ranking system using hybrid multi-signal scoring and explainable AI.
- Ranked candidates based on technical fit, retrieval relevance, behavior, and risk analysis with transparent results.

AI Startup Launchpad | Next.js, TypeScript, Supabase, PostgreSQL, OpenAI API

GitHub | Live Demo

- Built a GenAI SaaS platform that helps founders generate structured startup plans using AI.
- Added authentication, project management, AI plan generation, generation history, and user-specific data storage.

Opportunity OS | React Native, Expo, TypeScript, Supabase, PostgreSQL

GitHub | APK

- Built an AI-powered mobile platform that helps users discover verified scholarships, internships, hackathons, grants, and research opportunities through personalized profile-based recommendations.
- Implemented secure authentication, opportunity search and filtering, AI matching, trust scoring, application tracking, and official source integration using React Native and Supabase.

RAG-Based AI Knowledge Assistant | n8n, OpenAI API, RAG, Vector Database

GitHub

- Built a document-based AI assistant that answers questions from uploaded PDF documents.
- Used PDF extraction, embeddings, semantic search, vector storage, and context-based response generation.

Achievements & Certifications

- Merit Scholarship recipient for securing 2nd rank among all branches in B.Tech II Year.
- Natural Language Processing – NPTEL, IIT Kharagpur.
- Introduction to Prompt Engineering – IBM.
- Problem Solving Basic and Intermediate – HackerRank.
- GATE Set Go – CSE / DA – GeeksforGeeks.
